

# SmartBolts®

KNOW AT A GLANCE IT'S TIGHT

SmartBolts are tension indicating fasteners that ensure proper clamp force is achieved at installation and maintained over time. Each SmartBolt features a visual indicator that changes color to measure and display tension in real time. Tension creates the clamp force that keeps a bolted joint secure.

## INFRASTRUCTURE AIRPORT RUNWAY LIGHT FIXTURE JOINT

Lighting fixtures in runways, taxiways, and other in-pavement locations are critical to the safe operation of planes and machinery at airports. If these fixtures become loose they can create dangerous safety conditions while planes are in-flight, landing, or taxiing on the runway. However, maintenance of these fixtures is difficult due to their location in high-traffic areas. SmartBolt DTI provides visual feedback that these light fixtures are properly secured and immediately detects if the joint assembly has been compromised - leading to more efficient maintenance and a safer environment.
